About Me

Nicolas Mitchell is a software engineer who focuses on networking, automation, dev-ops, and distributed system design. When he's not working, he can be found in the climbing gym, playing video games, and contributing to open-source projects. Nico speaks English, Spanish, and Portuguese.

Skills

Areas of Expertise: Backend development, cloud infrastructure, networking, containers, concurrency, distributed systems, automation
Programming and Scripting Languages: C, JavaScript, Go, C++, Bash, Java, Python, Rust
Other Technologies: AWS, Docker, Ansible, Linux, SQL Databases, NOSQL Databases, React, Git, Kubernetes, Splunk

Open-Source Contributions

Godot Engine
Zellij
Istio

Hackathons

FirstBuild Hack the Home	2017, 2018
VandyHacks	2017
DerbyHacks	2018

Hobbies and Talents

Spoken Languages: English (fluent), Spanish (fluent), Portuguese (intermediate)
Music: Guitar (12 years), Singing (in a band), production (making beats with friends)
Fitness: Indoor rock climbing (bouldering), weightlifting

Education

Bachelor of Science – Computer Science and Engineering   May 2020
University of Louisville – JB Speed School of Engineering   **GPA**: 3.341/4.0

Work Experience

Software Engineer – Observability   September 2020 – Present
SAP   Palo Alto, CA
- Reduced the need for manual task execution by working on a team to architect and build an automated workflow scheduler
- Improved automated processes for server deployment and setup scripts
- Created visibility into critical production systems by building Splunk dashboards
- Ensured production deployment processes could be verified by writing deployment tests
- Simplified deployment by automating container building, pushing, and running using Ansible

Software Engineering Intern – Data Platform   June 2019 – August 2019
Red Ventures   Fort Mill, SC
- Developed backend micro-services in Golang for an internal data pipeline software
- Facilitated new software features by writing SQL database migrations
- Allowed for data connections between third party data providers like Segment and internal data pipeline by building Golang plugins
- Improved UX and integrated new backend components to web frontend with ReactJS

Visiting Research Assistant   January 2019 – May 2019
University of Southern California – Information Sciences Institute   Waltham, MA
- Researched and developed a system component for a DARPA funded project to automatically detect and respond to phishing emails
- Developed new features and fixed bugs for a Python natural language processing framework

Software Developer Intern   January 2018 – April 2018
El Toro   Louisville, KY
- Wrote an internal REST API with Golang to process, and schedule tasks using AWS
- Facilitated integrations for various databases including MongoDB, Aerospike, and PostgreSQL by creating and implementing a common interface
- Sped up internal data ingestion tool by over 1000% by implementing concurrent line processing using a worker pool
- Improved test coverage to 100% by adding necessary unit and integration tests in Golang

Student Tutor   August 2017 – April 2020
University of Louisville Resources for Academic Achievement   Louisville, KY
- Tutored students in Python, C, C++, Data Structures and Algorithms, and other CS topics

Applied Experience

Embedded Systems: Interfaced and displayed vehicle ECU data with an Arduino and LED screen, built a self-orienting solar panel using an Atmel microcontroller, built a touch-sensor game on a Raspberry Pi.
IoT/Serverless: Designed, developed, and deployed an IoT pilot project that ran sensor data through AWS IoT to an Aurora Serverless database cluster using a lambda function.
Networking/Architecture: Managed microservices in an AWS VPC separated into public and private subnets. Included components were a database, web API, and web client. Integrated web API and client with Auth0 SSO.
Distributed Systems: Developed networked chat room in Golang using a custom TCP protocol, deployed on AWS Elastic Containers. Developed naïve implementation of a gossip protocol deployed on a network of docker containers.
